

A New Way to do Business Online!

We have developed a true **business-to-business** portal specific to our customers needs.

- **Tired of Pop-ups?** We don't go there! As a matter of fact there is no advertising on the Total Access site. Use it for what you intended...ordering your tools and equipment.
- **Does your company have unique product numbers assigned to your tools and equipment?** Let us know and we can integrate your parts numbers into your searches on the Total Access site. No more remembering what your part number crosses over to in our system!
- **Want to have multiple favorites list?** One with standard items to start up a job? Or fill a new service truck? You can do that! Name your list whatever you want, and refer back to it over and over. Speeding up your ordering time and getting you back to work faster.
- **Want to see what is out on rent at jobsites?** Quickly look at what products you have out on rent and see where they are at. Cut down on un-necessary rental fees with forgotten equipment.
- **Need an invoice copy?** After hours? Why wait? Log-in and view, print or email any open or paid invoice 24 hours a day/7 days a week. Find it quickly! Search by date, PO number or Job number.
- **Fully customizable.** Total Tool's Sales and in-house IT department will meet with you and define any special needs your company has to make an online system work for you. Multiple users? Specific products shown—or blocked? Field personal view stock only, no ordering? Exclude certain shipping options? We have addressed these requests and more!

Our site is *not* public by design. **Total Access** was put in place to service our core customers and their specific needs, not to take orders from the guy next door. Request your login at: www.totaltool.com
